

Hartman Value Profile: Attention

Attention

Attention:

a measure of your natural ability to attend to, or pay attention to, specific information to make a decision.

- **Over Attentive**
- **Attentive**
- **Cautious**
- **Inattentive**

Attention is a measure of your natural ability to filter data and information to make a decision. Like clarity, attentiveness or inattentiveness can be a strength or a limitation depending on the demands of the environment and degree of balance with the other dimensions.

- **Over Attentive:** Having a bias toward the dimension and a tendency to place a great deal of importance on the dimension.
- **Attentive:** Having a balanced and generally positive view of the dimension and the ability to pay attention to the dimension without losing perspective of other dimensions.
- **Cautious:** Exhibiting caution and skepticism regarding the dimension. Tending not to focus or rely on the dimension to make decisions.
- **Inattentive:** Filtering out the dimension, not seeing the importance of it. Tending to be skeptical or critical and undervalue the dimension. (Note: good clarity may reduce some effects of inattentiveness)
