# Introduction

The Leadership Effectiveness Feedback Report consists of six components, which are described below.

## 1. Overall Summary

The summary results chart provides a quick visual representation of your scores in the eight competencies that make up the Leadership Effectiveness profile. The areas to concentrate on are those scores above 3.5 (strong) and below 2.75 (need further development). Please note that these competency scores are averages.

## 2. Category Descriptions

There are three sections for each of the eight competencies. The first of these three sections explains the competency, lists average scores, and then provides high and low score interpretation notes. The second section provides a graphical representation of individual question scores. The third section provides broadly-based improvement actions for those individuals wanting to develop their competencies.

## 3. 10/10 Report

The "10/10" Report page provides the average for the 10 highest scoring questions and the 10 lowest scoring questions. It also identifies the competency of each question.

### Note on 360 Degree Feedback

If you received feedback from your supervisor, direct reports or peers using this assessment, please note the following: Ratings responses from all persons who completed the assessment are averaged to produce the results.

### Graph Information

Norm bars shown on graphs are the progressive average scores of all individuals rating themselves on this questionnaire.

# Overall Summary

## Emotional Intelligence

## Contextual Thinking

## Directional Clarity

## Creative Assimilation

# Overall Summary (cont)

## Change Orchestration

## People Enablement

## Reciprocal Communication

## Drive and Persistence

# Emotional Intelligence

This section on Emotional Intelligence looks at your ability to recognize, understand, and harness your own feelings and the feelings of others. It asks the question: "How intelligently aware are you of your own emotional reactions and those of others, and how effective are you at putting that information to good use?"

## Interpretation

### LOW (less than 2.75)

Response ratings predominantly in the ones and twos ("occasionally" and "almost never") suggest that you will almost entirely seek to separate feelings and emotions from the "task" of leadership. People with relatively low levels of emotional intelligence are likely to avoid taking on a leadership role at all. However, if they do, they prefer to manage systems or resources in preference to managing people directly.

A low score indicates that you lead others by "the book" rather than by relying on your own judgment or intuition. When you find yourself in a leadership position, you will often try to lead from the front or adopt a "command and control" style without the support of others.

### HIGH (greater than 3.5)

Response ratings predominantly in the fours and fives ("almost always" and "very frequently") suggest that you are someone who reflects regularly and deeply on what good leadership might be in terms of your own perception of yourself, as well as your perceptions of others. You are also likely to think about how you can continue to make helpful interventions by using a strong set of personal values and beliefs.

A high score indicates that you listen to people carefully and calmly before seeking a particular leadership role (if it is deemed to be appropriate at all). You tend to try to create a trusting and sincere climate in which good decisions can come from anyone with the best ideas.

1. I believe that leadership is about serving others.

## Emotional Intelligence (cont)

2. I am aware of the most important concerns of people I lead.

3. I draw on a strong set of values to guide day-to-day decisions.

4. I use criticism from others to improve myself and learn.

5. I notice how others are feeling.

## Emotional Intelligence (cont)

6. I am good at empathizing with people.

This section on Emotional Intelligence looks at your ability to recognize, understand, and harness your own feelings and the feelings of others. It asks the question: "How intelligently aware are you of your own emotional reactions and those of others, and how effective are you at putting that information to good use?"

### Suggestions for Overall Improvement

The low scorer needs to think much more deeply about their own personal style and way of operating, and recognize that it can always be improved or adjusted to suit the styles or responses of people who are very different. Being self-critical and recognizing your own shortfalls is no easy task; it will require a sustained effort and lots of support and constructive feedback from others.

### Ways to Strengthen or Improve Emotional Intelligence

- Think deeply about your own personal values, and share them with your colleagues.
- Gather the opinions or views of people around you (your supervisor, peers, and team members).
- Take time to quietly reflect on how you are perceived, and how you personally feel about the feedback.
- Use the feedback to plan how you might modify your behavior (building on the positives and lessening or eliminating the negatives).
- Think about what you might be able to do to work with your fellow colleagues and team members more effectively.

# Contextual Thinking

This section on Contextual Thinking looks at the extent to which you put specific events, tasks, and actions into a wider perspective or pattern. It asks the question: "How effectively do you connect related and unrelated information in order to make sense out of what you experience?"

## Interpretation

### LOW (less than 2.75)

Response ratings predominantly in the ones and twos ("occasionally" and "almost never") suggest that you often miss the connections between occurrences or events, and tend to be confused or puzzled by some situations. Such individuals prefer to focus analytically on how things come about, rather than to ask why they have occurred at all. They tend to over-rely on past experience, seeing it as the only guide to understanding what is happening or might occur in the future.

A low scorer generally takes a "narrow" view of what he or she experiences. Each event or occurrence is treated as distinct or separate from others, rather than connected logically to other events or facts. This leads to an inability to see patterns easily and makes a person less confident being able to solve problems or understand why things are happening as they are.

### HIGH (greater than 3.5)

Response ratings predominantly in the fours and fives ("almost always" and "very frequently") suggest that you generally maintain a "big picture" or conceptual view of events, and are able to quickly grasp both major and minor connections, where they exist. You are also likely to pride yourself on being flexible, open-minded, and effective at solving problems and reconciling conflicting data.

A high scorer tends to look for patterns in even the most complex situations or issues, and looks for a range of different connections (both relevant and irrelevant). The high scorer often enjoys solving puzzles and conundrums as a pleasurable way to hone or test their skills.

7. I am strongly aware of trends, long before they have a direct impact or effect.

## Contextual Thinking (cont)

8. I keep track of what's going on in the world around me.

9. I have a range of contacts with whom I exchange views about emerging trends.

10. I am good at making connections between seemingly disparate ideas and information.

11. When things are not clear, you have to look for clues in order to find the answers.

## Contextual Thinking (cont)

12. I enjoy looking for patterns in what I perceive or experience.

This section on Contextual Thinking looks at the extent to which you put specific events, tasks, and actions into a wider perspective or pattern. It asks the question: "How effectively do you connect related and unrelated information in order to make sense out of what you experience?"

### Recommendations for Overall Improvement

Low scorers need to try out more techniques and methods to develop their ability to contextually think more effectively and creatively such as using "lateral" thinking or brainstorming and asking the question "why". They can become more proficient by doing crossword puzzles and other mentally challenging activities and reading mysteries to develop their skills outside the organizational context.

### Ways to Strengthen or Improve Contextual Thinking

- Try to see beyond the immediate issue, situation, or problem by establishing a context or a clear frame of reference.
- Practice identifying any links or connections in your experiences by keeping a personal journal in which you can record your thoughts and look for improvements over time.
- Read widely and look for broad trends and patterns in events, situations, news reports, opinion and analysis and so on.
- Build a network of contacts outside the organization of people who can help you to keep up-to-date and in touch with the latest thinking.
- Whenever you don't understand or want to know more, ask questions including the question "why?".

# Directional Clarity

This section on Directional Clarity looks at your ability to identify a credible destination and determine and communicate how to get there in a straightforward and simple way. It asks the question: "How clearly, credibly, and unequivocally do you point the way for people to want to travel with you and to stay on track?"

## Interpretation

### LOW (less than 2.75)

Response ratings predominantly in the ones and twos ("occasionally" and "almost never") suggest that you will select a direction or course of action on the basis of very limited, subjective evaluation, failing to assess its worth as a way to go. You are also likely to change direction frequently and follow a path of least resistance.

A low scorer has trouble identifying and establishing direction. As a result, when the individual is in a leadership position, he or she tries to hit the wrong target or go for several different targets. Some individuals fail to set any goals whatsoever.

### HIGH (greater than 3.5)

Response ratings predominantly in the fours and fives ("almost always" and "very frequently") suggest that you will effectively evaluate courses of action or "credible" paths to the future, and will quickly engage in a range of ways to communicate and describe these paths efficiently to those around you. This directional clarity wins fast support and willingness to follow the route that has been selected.

A high scorer confidently and clearly sees and describes a credible destination, whether or not he or she is in a formal leadership position. Such an individual is likely to identify natural milestones and measures of progress and assess the effort needed to succeed, and communicate these things to others.

13. I generate a clear personal vision of what the future could be like.

## Directional Clarity (cont)

14. I believe that every goal needs a measurement system.

15. I have a clear set of targets and priorities.

16. I have a strong strategic sense of where to go next.

17. If I can't see the ultimate goal, I find a closer target or milestone to aim for.

## Directional Clarity (cont)

18. I can make an effective argument as to why we should go in a certain direction.

This section on Directional Clarity looks at your ability to identify a credible destination and determine and communicate how to get there in a straight forward and simple way. It asks the question: "How clearly, credibly, and unequivocally do you point the way for people to want to travel with you and to stay on track?"

### Recommendations for Overall Improvement

Low scorers need to find quiet time to think about strategy and direction for their own efforts and others. This will mean researching potential alternatives and involve wider consultation with people to obtain input and ideas, as well as carefully weighing the pros and cons of one direction versus another before a decision is made. This is a difficult skill to develop quickly; greater involvement by people who are strong in this competency would improve overall leadership of the team.

### Ways to Strengthen or Improve Overall Improvement

- Take a longer-term perspective on the future than you have taken in the past. Weigh all the different alternatives that you identify in order to determine the best direction to take.
- Regularly engage people on your team in conversations about what they think the future might hold, and build these ideas and perspectives into your long-range planning and goals.
- Develop four or five medium- to long-term goals and list them on a single piece of paper clearly describing a future vision and how it takes the organization positively forward.
- Think about how you might effectively present the advantages of taking this chosen course to different people in order to solicit their support and win it.
- Identify one key process in your work area that could be improved by technology, and develop a plan to describe how this might be brought about.

# Creative Assimilation

This section on Creative Assimilation looks at how well you creatively draw together disparate information to arrive at robust and clear decisions or courses of action. It asks the question: "How challenging and/or innovative is your approach to processing different or conflicting data in order to make sense of it and act upon it wisely?"

## Interpretation

### LOW (less than 2.75)

Response ratings predominantly in the ones and twos ("occasionally" and "almost never") suggest that you often accept information at face value and do not take time to reflectively weigh the alternatives before evaluating and acting on the information. You are also more likely to stick to tried and proven methods, rather than to invent new approaches.

A low scorer tends to spend too little time creatively reflecting or hypothesizing about issues or events. As a result, such individuals are more likely to be uncomfortable with ambiguity and are more likely to dislike and be dismissive of complex problems or issues that cannot be easily solved or in which they have little interest.

### HIGH (greater than 3.5)

Response ratings predominantly in the fours and fives ("almost always" and "very frequently") suggest that you are comfortable and adept at evaluating a wide range of data and think critically before you choose a logical or sensible course of action. To do this, you tend to keep a flexible and open mind and look flexibly for other data that might suggest a new or different perspective.

A high scorer is likely to enjoy thinking about diverse situations or ideas and juggles several balls in the air at once. He or she thinks regularly and deeply about more complex issues and situations, and is always looking for new or insightful solutions that can work.

19. People would say that I bring creative approaches to decision making.

## Creative Assimilation (cont)

20. It is more important to find key information than to have all the data.

21. I regularly play "devil's advocate" when I evaluate courses of action.

22. I extrapolate from experience when facing new challenges.

23. I highly value diversity of perspectives and opinions.

## Creative Assimilation (cont)

24. I see a conflict or a problem as an opportunity to find a new solution.

This section on Creative Assimilation looks at how well you creatively draw together disparate information to arrive at robust and clear decisions or courses of action. It asks the question: "How challenging and/or innovative is your approach to processing different or conflicting data in order to make sense of it and act upon it wisely?"

### Recommendations for Overall Improvement

Low scorers need to stop making rapid judgments about what they perceive or experience and make sure that they consider other data or possible courses of action before committing themselves to a decision. This can be done by doing 3 things:

1. Practice challenging assumptions.
2. Practice playing devils advocate.
3. Arranging and participating in brainstorming sessions to prepare for times when significant challenges or decisions arise.

### Ways to Strengthen or Improve Creative Assimilation

- Practice looking at issues, events, and problems from as many different points of view as you can.
- Ask yourself how you would react if something were to change dramatically. What would happen if a specific event occurred at a future time, when things were different? Could you reverse or invert some of the factors or parts of the situation? What could you introduce by way of new information or ideas to change or alter the situation?
- Design quiet time into every day to calmly reflect and synthesize data, evidence, and facts into information that you can use to make decisions regarding action.
- Look for unusual or different connections between seemingly disparate or conflicting ideas and concepts.
- Challenge your thinking and that of others so you all identify the most innovative and creative solutions possible before taking action.

# Change Orchestration

This section on Change Orchestration looks at how well you anticipate and plan for future change and then manage yourself and others to handle it well. It asks the question: "How effectively do you manage personal and widespread change in order to actively steer the process to positive and beneficial ends?"

## Interpretation

**LOW (less than 2.75)**

Response ratings predominantly in the ones and twos ("occasionally" and "almost never") suggest that you tend to become caught up in change situations, yet find it difficult to control them. You are also likely to find that such change has a range of unexpected twists and turns, to which there never seems to be any easy answers.

A low scorer tends to find anything other than minor changes frustrating and commanding of much more of their time and energy that they might like. As a result, this kind of person often feels like a "hostage to fortune," and is likely to suffer higher levels of stress than others.

## **HIGH (greater than 3.5)**

Response ratings predominantly in the fours and fives ("almost always" and "very frequently") suggest that you are comfortable with personal change and comfortable helping others to cope with changes forced upon them. To do this, you are likely to quickly find ways to plan how to tackle what is ahead, and then try to strongly work the plan you have created.

A high scorer tends to anticipate change as much as possible, and takes early proactive steps to be as prepared as possible. In addition, the high scorer is likely to maintain a flexible attitude and disposition, and does what is necessary to deal with the pressure and help others do the same.

25. I break projects down into manageable components.

## Change Orchestration (cont)

26. I try to manage risks.

27. I think about potential adverse reactions, and plan how to deal with them.

28. My own behavior is adaptable and flexible to changing needs.

29. I make sure that effective contingency plans are designed and made available.

# Change Orchestration (cont)

30. I tackle resistance to change quickly and fairly.

This section on Change Orchestration looks at how well you anticipate and plan for future change and then manage yourself and others to handle it well. It asks the question: "How effectively do you manage personal and widespread change in order to actively steer the process to positive and beneficial ends?"

## Recommendations for Overall Improvement

Low scorers should try to become less "consumed" by daily activities and priorities and spend much more time anticipating what might be around the corner. Low scorers seek out and talk to effective agents or managers of personal and organizational change in order to learn coping strategies for different situations and circumstances.

## Ways to Strengthen or Improve Change Orchestration

- Design regular time into your day or week to think about the medium- or long-term future (not just your day-to-day or most pressing issues or problems).
- Imagine a range of possible outcomes or results that could come about as a result of specific personal or organizational changes that might affect you in the future.
- Carefully consider what you might need to do right now to accommodate any and all these scenarios.
- Actively look for opportunities to introduce "step-change" initiatives, rather than small incremental improvements, whenever the benefits are clear to see.
- Help others to come to terms with change and challenge any resistance firmly but fairly.

# People Enablement

This section on People Enablement looks at the extent to which you trust, coach, and guide people in order to influence and help them control their own destiny through their own efforts. It asks the question: "How well do you empower individuals and teams so that they believe that the consequences of their actions are their own?"

## Interpretation

### LOW (less than 2.75)

Response ratings predominantly in the ones and twos ("occasionally" and "almost never") suggest that you are oblivious or unconcerned about people's individual needs, preferring to focus more on goals and/or tasks. As such, you will rely on systems and procedures to provide the necessary leadership framework, rather than have to spend time building one-to-one relationships yourself.

A low scorer comes across as individualistic and unable to trust the skills and abilities of other people to achieve goals and targets without strong "command and control." Such an individual tends to spend little or no time sharing knowledge or coaching others, and does not make time to help and support the team when the team needs it.

### HIGH (greater than 3.5)

Response ratings predominantly in the fours and fives ("almost always" and "very frequently") suggest that you use your leadership skills to help and guide people in ways that lead them to become more self-sufficient, and that you encourage them to find their own solutions and commit to their own decisions. You are also likely to try to understand people at a "deeper" level and offer the kind of leadership that they value the most.

A high scorer tends to build high levels of trust and empathy. He or she creates an open and warm climate in which other individuals feel that they can take reasonable risks in their work in order to meet goals and feel appreciated for their efforts and results.

31. I like to encourage people to come up with their own conclusions.

## People Enablement (cont)

32. I try to actively catch people doing something right and encourage them.

33. I work with the people I lead to help them create individual development plans.

34. I give people plenty of room to stretch themselves and learn different skills.

35. I openly recognize other people's strengths and contributions.

## People Enablement (cont)

36. I have an "open door" policy to provide any coaching or guidance needed.

This section on People Enablement looks at the extent to which you trust, coach, and guide people in order to influence and help them control their own destiny through their own efforts. It asks the question: "How well do you empower individuals and teams so that they believe that the consequences of their actions are their own?"

### Recommendations for Overall Improvement

Low scorers need to give people much more room or authority to act, without letting them feel that any of their mistakes will be punished or held against them. Low scorers can also program-in regular time to identify and recognize people's efforts, and to make themselves more available to offer general coaching and support to the team (even if it is for only a short time each day or week initially).

### Ways to Strengthen or Improve People Enablement

- Take an active interest in finding out more about what fellow team members and colleagues in the same broad work area are responsible for doing and achieving and, identify areas where they have strong general skills or competence.
- Create specific opportunities to empower individuals. Give them full responsibility for tasks and projects that you would normally handle yourself, depending on their skills or interest. This will stretch them.
- Engage in frequent "walk the talk" and one-to-one coaching, and listen to what they are saying.
- Engage colleagues in debate about your own responsibilities, skills, and preferences, and look for opportunities to work together more collaboratively to get a better overall result for your organization.
- Plan regular opportunities for different people to work together as a team, and help them to achieve success. Be sure they get direct credit and recognition.

# Reciprocal Communication

This section on Reciprocal Communication looks at the extent to which you communicate with economy and clarity and welcome feedback. It asks the question: "How well do you design and send your message and then attentively listen to people's responses in order to adjust?"

## Interpretation

### LOW (less than 2.75)

Response ratings predominantly in the ones and twos ("occasionally" and "almost never") suggest that you miss opportunities to communicate when it would be helpful and fail to take enough time designing the message or thinking about how it might be optimally delivered. You are also likely to find little time to listen to feedback and adjust accordingly.

A low scorer tends to communicate on the run or at the last minute, failing to shape the message carefully or think about who will receive the message and how it should be delivered. Low scorers are likely to be thought of as poor communicators and poor listeners. They find it difficult to get their messages across credibly or in a way that inspires or enthuses the team.

### HIGH (greater than 3.5)

Response ratings predominantly in the fours and fives ("almost always" and "very frequently") suggest that you are highly conscious of the need to create an open and positive climate in which you can listen and gather feedback effectively and efficiently. You are likely to find ways to maintain clear and frequent communication and use a range of different "channels" and methods.

A high scorer comes across as a highly approachable individual who uses a range of different communication methods and styles to make sure that information flows in both directions freely and sincerely, and in varied and interesting ways. High scorers enjoy talking to and listening to people.

37. As a leader, I openly demonstrate that I provide and welcome feedback and consider it critical to effective leadership.

## Reciprocal Communication (cont)

38. I use multiple channels to get messages across to people.

39. I am able to get complicated ideas across clearly.

40. I am appreciated for my direct and clear communication style.

41. I listen enthusiastically and positively.

## Reciprocal Communication (cont)

42. I encourage people to speak their minds openly and to share their concerns.

This section on Reciprocal Communication looks at the extent to which you communicate with economy and clarity and welcome feedback. It asks the question: "How well do you design and send your message and then attentively listen to people's responses in order to adjust?"

### Recommendations for Overall Improvement

Low scorers need to engage in a rigorous self-assessment of their relative effectiveness as a listener and as a communicator. They should use what they learn about themselves to focus on improving areas of weakness or limitation. In addition, low scorers should study effective communicators and try to practice some of their techniques wherever and whenever the opportunities present themselves.

### Ways to Strengthen or Improve Reciprocal Communication

- Give people time to finish speaking before forming your own reply in your conversations. Listen, maintain your focus and concentrate as much as possible.
- Great communicators carefully plan what they say and how they want to say it, so that their message is always well received. Get into the habit of doing the same.
- Experiment with different communication methods or channels so you can appeal to a wider range of people.
- Keep a log or a diary to record performance feedback or comments. Make a point of speaking to individuals in as direct a way as possible on a one-to-one basis.
- Follow the main points or issues in all group meetings, and develop a firm personal view. Put this view forward in a clear manner, explaining why you hold your particular position.

# Driving Persistence

This section on Driving Persistence looks at the extent to which you tenaciously stay on track and maintain a persistent focus on your goals. It asks the question: "How relentlessly do I pursue my targets, even in the face of challenge and/or adversity?"

## Interpretation

### LOW (less than 2.75)

Response ratings predominantly in the ones and twos ("occasionally" and "almost never") suggest that you expect problems or failure to some extent, and you therefore pursue goals or aims with less confidence than you should. When major obstacles or problems do arise, you are likely to give in or change course rather too quickly, having given in and accepted the problem to be inevitable.

A low scorer tends to lead without conviction or strength of purpose. As a result, he or she is likely to pursue goals and targets without great enthusiasm or effort, and tends to be easily distracted or knocked off course by even minor issues or events.

### HIGH (greater than 3.5)

Response ratings predominantly in the fours and fives ("almost always" and "very frequently") suggest that you see obstacles or difficulties in a journey as inevitable. This means that you try to prepare yourself and those who depend on you to solve problems and overcome obstacles. Then you refocus on the original goals or aims and relentlessly carry on.

A high scorer pursues their personal and organizational goals with seriousness and commitment. Such individuals are likely to be internally motivated to not only keep going, but to do so even when the going gets difficult or inevitable hurdles appear along the way.

43. I do not get discouraged, even when things get difficult.

## Driving Persistence (cont)

44. I have the courage of my convictions.

45. I believe that people can move mountains if they try.

46. I don't give up easily, even when the going is hard.

47. I challenge mediocrity whenever and wherever it is in evidence.

## Driving Persistence (cont)

48. It is okay to fail, as long as you have given your best.

This section on Driving Persistence looks at the extent to which you tenaciously stay on track and maintain a persistent focus on your goals. It asks the question: "How relentlessly do I pursue my targets, even in the face of challenge and/or adversity?"

### Recommendations for Overall Improvement

Low scorers need to set only those goals or targets that can realistically be achieved that they have the time and commitment to assiduously work toward . Low scorers also need to develop their assertiveness skills to more firmly deal with distractions and competing priorities, and more readily defend their own priorities from attack.

### Ways to Strengthen or Improve Driving Persistence

- Carefully record every commitment that you make and prioritize all that are important to you. Post it where you will see it every morning.
- Plan how you will maintain your focus and energy to achieve success.
- Practice being more assertive about your own needs. Tell people about your important goals, and inform them firmly that these cannot be compromised or put ahead of things that are less significant for you personally.
- Look for opportunities to improve your skills and knowledge in many and different ways every day. Take advantage of these opportunities.
- Always maintain the courage of your convictions, and demonstrate as much calm, assured leadership as you can even when you are inwardly uncertain.

## The 10/10 Report

### Top 10 Strengths

#### Drive and Persistence

45. I believe that people can move mountains if they try. 3.58

#### Reciprocal Communication

41. I listen enthusiastically and positively. 3.47

#### Creative Assimilation

22. I extrapolate from experience when facing new challenges. 3.47
